Title: Selective ion transport in functionalized carbon nanotubes
Author: Olga N. Samoylova, Emvia I. Calixte, Kevin L. Shuford
Publication: Applied Surface Science
Publisher: Elsevier
Date: 30 November 2017
© 2017 Elsevier B.V. All rights reserved.

Title: Molecular Dynamics Simulations of Ion Transport in Carbon Nanotube Channels

Author: Olga N. Samoylova, Emvia I. Calixte, Kevin L. Shuford

Publication: The Journal of Physical Chemistry C

Publisher: American Chemical Society

Date: Jan 1, 2015

Copyright © 2015, American Chemical Society

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.

Accepted manuscripts may be distributed via repositories after an embargo period of 12 months

If you are a reader looking for the terms of use for information published by the Royal Society of Chemistry under our standard licence to publish please refer our [terms of use](#) ([/journals-books-databases/librarians-information/products-prices/licensing-terms-and-conditions/#non-commercial-terms](#)).

CHORUS

We are members of the CHORUS initiative, and therefore make the Accepted manuscript version of articles describing research funded by participating funders publicly available on our web site after an embargo period of 12 months. This is effective for research published from 1st March 2018 onwards. Unless otherwise noted on the article the Accepted manuscript is licensed under the terms of our standard license to publish and is subject to our standard [reuse terms](#) ([/journals-books-databases/librarians-information/products-prices/licensing-terms-and-conditions/#non-commercial-terms](#)).

Re-use permission requests

Material published by the Royal Society of Chemistry and other publishers is subject to all applicable copyright, database protection, and other rights. Therefore, for any publication, whether printed or electronic, permission must be obtained to use material for which the author(s) does not already own the copyright. This material may be, for example, a figure, diagram, table, photo or some other image.

Author reusing their own work published by the Royal Society of Chemistry

You do not need to request permission to reuse your own figures, diagrams, etc, that were originally published in a Royal Society of Chemistry publication. However, permission should be requested for use of the whole article or chapter **except if reusing it in a thesis**. If you are including an article or book chapter published by us in your thesis please ensure that your co-authors are aware of this.

Reuse of material that was published originally by the Royal Society of Chemistry must be accompanied by the appropriate acknowledgement of the publication. The form of the acknowledgement is dependent on the journal in which it was published originally, as detailed in 'Acknowledgements'.

Material published by the Royal Society of Chemistry to be used in another of our publications

Authors contributing to our publications (journal articles, book or book chapters) do not need to formally request permission to reproduce material contained in another Royal Society of Chemistry publication. However, permission should be requested for use of a whole article or chapter. For all cases of reproduction the correct acknowledgement of the reproduced material should be given. The form of the acknowledgement is dependent on the journal in which it was published originally, as detailed in the 'Acknowledgements' section.

Acknowledgements —

The Royal Society of Chemistry publishes some journals in partnership with, or on behalf of, other organisations; these journals require a specific wording of the acknowledgement when work is reproduced from them. The text for the acknowledgement for these journals, and the standard wording to be used by all other journals are given below.

Standard acknowledgement

Reproduced from Ref. XX with permission from the Royal Society of Chemistry.

Non-standard acknowledgements

Reproduction of material from NJC (New Journal of Chemistry)

Reproduced from Ref. XX with permission from the Centre National de la Recherche Scientifique (CNRS) and the Royal Society of Chemistry.

Reproduction of material from Photochemical & Photobiological Sciences (PPS)

Reproduced from Ref. XX with permission from the European Society for Photobiology, the European Photochemistry Association, and the Royal Society of Chemistry.

Reproduction of material from PCCP (Physical Chemistry Chemical Physics)

Reproduced from Ref. XX with permission from the PCCP Owner Societies.

Reproduction of material from Inorganic Chemistry Frontiers

Reproduced from Ref. XX with permission from the Chinese Chemical Society (CCS), Peking University (PKU), and the Royal Society of Chemistry.

Reproduction of material from Organic Chemistry Frontiers

Reproduced from Ref. XX with permission from the Chinese Chemical Society (CCS), Shanghai Institute of Organic Chemistry (SIOC), and the Royal Society of Chemistry.

Reproduction of material from articles in the Journal Archive from Geochemical Transactions

Reproduced from Ref. XX with permission from the American Chemical Society, Division of Geochemistry and the Royal Society of Chemistry.

Using third party material in Royal Society of Chemistry publications

We must ensure that the material we publish does not infringe the copyright of others. We require the author(s) to obtain, at the earliest opportunity, the relevant permissions that might be needed from third parties to include material that belongs to someone else.

Please contact the publisher/copyright owner of the third party material to check how they wish to receive permission requests. Please plan to submit your request well ahead of publication of your material.

The most common procedures for permission requests are outlined below.

- A number of publishers have opted out of receiving express permissions as long as they fall under the rules of the [STM Permission Guidelines](http://www.stm-assoc.org/copyright-legal-affairs/permissions/permissions-guidelines) (<http://www.stm-assoc.org/copyright-legal-affairs/permissions/permissions-guidelines>).
- If they do not fall into the category above, the majority of publishers now use RightsLink from the Copyright Clearance Center (CCC) to process their requests.
- Other publishers have their own permission request forms and/or specify what information they need to process any permission request.
- If the publisher/copyright owner does not have a specific procedure please complete and submit the 'permission request form for non-RSC material (<http://globalassets/05-journals-books-databases/journal-authors-reviewers/licences-copyright-permissions/ag-gc-permission-request-form-for-non-rsc-material.pdf>)' form. Send the form to the permission administrator or editor of the relevant publication.
- If the copyright owner has opted to publish under a Creative Commons licence, licensees are required to obtain permission to do any of the things with a work that the law reserves exclusively to a licensor and that the licence does not expressly allow. Licensees must credit the licensor, keep copyright notices intact on all copies of the work, and link to the license from copies of the work.

In all cases the following rights need to be obtained.

Permission is required to include the specified material in the work described and in all subsequent editions of the work to be published by the Royal Society of Chemistry for distribution throughout the world, in all media including electronic and microfilm and to use the material in conjunction with computer-based electronic and information retrieval systems, to grant permissions for photocopying, reproductions and reprints, to translate the material and to publish the translation, and to authorise document delivery and abstracting and indexing services.

Please note that the Royal Society of Chemistry is also a signatory to the STM Permission Guidelines.

Using material published by the Royal Society of Chemistry in material for another publisher

If you require permission to use material from one of our publications or website in a publication not owned by us, and you are not the author of our publication, the following procedures should be followed.

Before sending in any request you should check that the material you wish to reproduce is not credited to a source other than the Royal Society of Chemistry. The credit for an image will be given in the caption of the image or sometimes in the list of references.

Please plan to submit your request well ahead of publication of your material. Please note that we are unable to supply artwork for the material you may wish to reproduce.

Reproducing material from a Royal Society of Chemistry journal

To request permission to reproduce material from a Royal Society of Chemistry journal please use RightsLink.
