

## Recommendations

**What elements do you feel are essential to these boxes?**

- Objects students can see & feel
- Activity ideas & masters

**What elements do you feel are missing from the boxes?**

Having no prior experience, the boxes look great to me and seem like something my students will enjoy.

**In regard to the curriculum binders included in some of the boxes; do you find the material helpful? If not, what would you suggest to replace it?**

I do find the material helpful.

However, it would be a little difficult to navigate without reading the entire thing multiple times.

**Would related or suggested activities in the format of a CD be useful?**

It could be useful if it had printables or interactive resources that could be used on my one classroom computer or a t.v. I could checkout.
