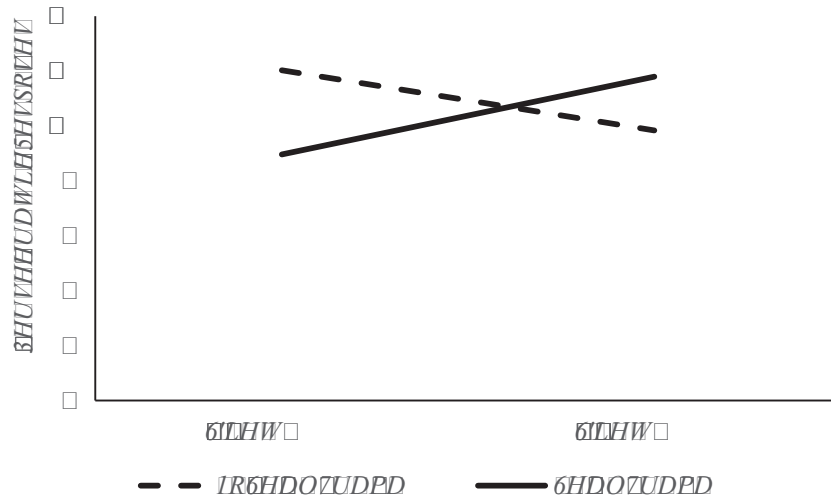

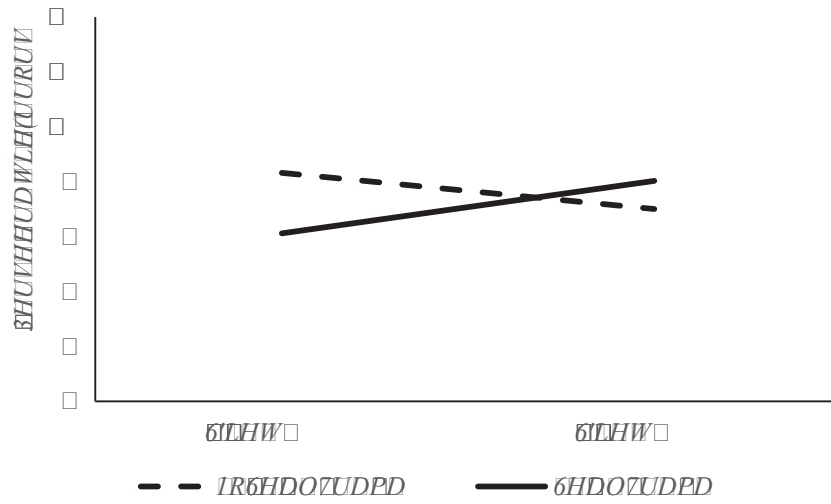

Figure 3 shows the results of the regression analysis for the dependent variable Y and the independent variable X . The solid line represents the regression equation $Y = 0.2X + 4$ and the dashed line represents the regression equation $Y = -0.2X + 7$. The regression coefficients are $\beta_1 = 0.2$ and $\beta_2 = -0.2$, respectively. The regression equations are $Y = 0.2X + 4$ and $Y = -0.2X + 7$.

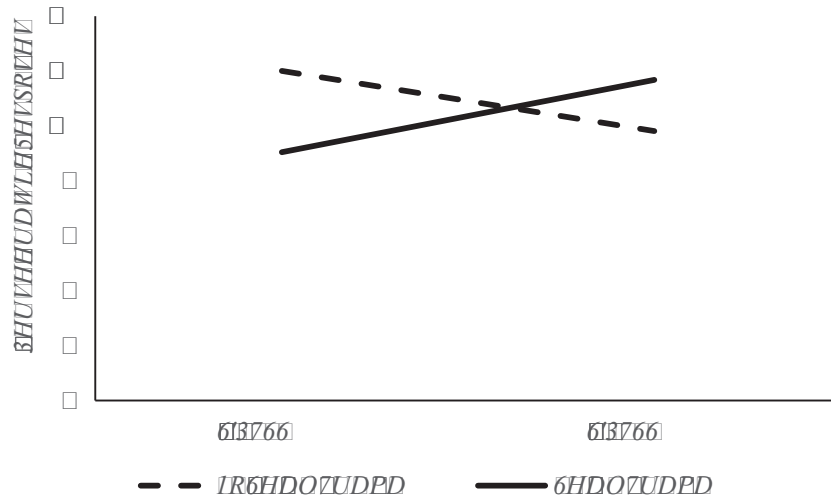

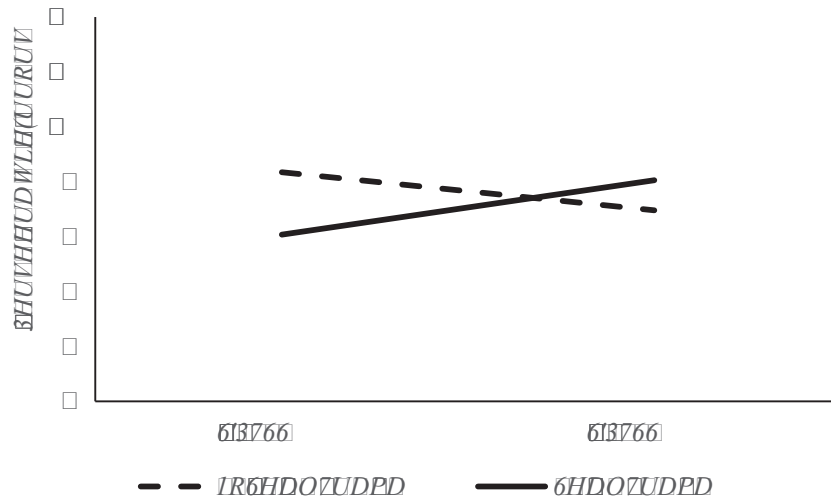

Figure 4: Comparison of the two data series (1R6HDOZUDEP and 6HDOZUDEP) over two time points (613766). The y-axis represents the variable being measured (SHUVHHUDWLH(UURUV and SHUVHHUDWLHSHVSRVHV). The x-axis represents the time points (613766). The dashed line represents the 1R6HDOZUDEP series, and the solid line represents the 6HDOZUDEP series.
